PROJECT DETAIL ENQUIRY FORM

(To be completed by Client)

Decorative coloured concrete floor finishes are installed as either:

- A : dry powder (ADCO FloorArt 151D) monolithically into the fresh concrete or screed surface
- Or B : 4 mm overlay system (ADCO CemArt 152) into wet bonding slurry (ADCO Bonding Slurry 271) onto existing prepared sound surfaces
- Or C : 6-8 mm overlay system (ADCO CemArt 152-68) into wet bonding slurry (ADCO Bonding Slurry 271) onto existing prepared sound surfaces

Decorative coloured concrete wall finishes are installed as either:

- D : brush-on (ADCO Colcem) cementitious paint (**textured finish**)
- Or E : 2-3 mm trowel-on skim plaster **smooth steel-trowelled finish** (ADCO Colplas Stucco 341)

All surfaces can be sealed depending on the application with systems based on acrylic resin, siloxane-repellent, wax, polyurethane or epoxy.

In addition to the above, we offer the supply of premixed screed, ADCO Micon 2530. This product is installed wet-on-wet into ADCO Bonding 271T onto previously prepared and water-saturated concrete surfaces.
